Sound Advice

by Zil Nettil

The Actual Alphabet

The English language is difficult to decipher when learning to read as:

Only 7 of the Capital Consonants have a letter sound that could be used on its own merits. The other Capital letters are a combination of lower case letter sounds with the occasional Capital vowel sound added.

When melding letter sounds, how does a student know what sound to make when: a word is usually a combination of both lower and Capital letter sounds. Then some combinations do not match any other letter sound that's contained within both alphabets. And also, many letters written within some words, do not make an actual sound contribution to the word.

We begin with the sounds of the "actual alphabet":

'vowels' a e i o u A E I O U
and

'consonants' b B c ch C d D f g

G h j k l m n p P q r s sh t th T v V w x y z
Every 'lower case' letter has a unique sound, & should always have priority over the 'upper case' letters. As only 7 of the 'CAPITAL CONSONANTS' have a sound that can be used in this spoken language.

The "other CAPITAL consonants,"

ef= F Ach= H JA= J KA= K el= L em= M en= N cu= Q
ar= R es= S abI.u= W ex= X wI= Y zed= Z

Are mainly used for visual purposes, as in:

recognising the importance of a word,
for example; Australia, = a country

Mr Peter and Dr Susan Long
= people and their 'titles'.

Or for :- emphasising word/s = RUN SCREAM

and for

sounding out letters singularly.

Fig. 6

12/17

Before the vowels and consonants are memorised by visual/tactile sound association, 2
 Use the 'new alphabet cards' when learning the letters.
 Each sound of the alphabet could be described as either short or long. And to help those reading for the first time, additional symbols have been added.

For the 'short' sounds, a dot under the letter/s will signify that a 'lower case' letter sound is to be made. for example; but or but

the dots placed between the letters, tell the reader to 'meld' those letter sounds into one sound.

For the 'long' sounds, a dash under the letter/s will show that the 'capital letter' sound is to be made, for example; greed or greed

the dash joined between the letters, tell the reader to 'meld' those letter sounds into one sound.

Letters that are silent - do not sound within a word - although the letter is written there. When a is placed around the letter/s it means it is silent.

For single or combined letter sounds; that are not written as they sound, - a warning "tilda" will show the correct letter sound - for example prey sky

If the sound cannot be replaced with a letter from the alphabet, - then six separate numbers denote where they can find the 'sound needed' to say the complete word.

ow = owl
1 1

ar = banana
2 2

er = first
3 3

ooe = grew
4 4

Or = talk
5 5

ou = should

Letter Sounds

Can you say all the sounds correctly? Ask a friend to listen - while you sound the letters + numbers 'out loud'.

Or

you could record your voice, while you say them.

Then listen to yourself, when you play the recording back.

Was your voice copying all the sounds correctly?

When you can say all the sounds correctly, then blending of the letters, into words begins.
